Abstracts of the
X Parnas Conference
Young Scientist Forum „Molecules in the Living Cell and Innovative Medicine”

10–12 July 2016,
Wrocław, Poland

Contents

Session I. Moonlighting proteins ................................................................. 1
Andrzej Dęngaj, Chair

Session II. Biology of stress response ..................................................... 5
Abdussalam Azem, Chair

Session III. Cell receptors, cell membranes and intracellular transport .......... 19
Olga Matyshevska, Chair

Session IV. Cancer biology ................................................................. 32
Michał Sharon, Chair

Session V. The state-of-the-art integrated structural biology –
a hawk-eyed view of biomolecular structure ............................................ 40
Mariusz and Łukasz Jaremko, Chairs

Session VI. Various aspects of cancer research –
from epigenome regulation to anti-cancer drugs ......................................... 45
Serhiy Komisarenko, Chair

Session VII. Structural computational biology and drug design .................. 62
Amnon Horovitz, Chair

Session VIII. The role and/or use of particular enzymes in mitosis regulation,
sensor construction and yeast cell engineering .......................................... 67
Valeriy Filonenko, Chair

Session IX. Spotlights on Polish life sciences ............................................ 71
Adam Szweczyk, Chair

Authors Index ............................................................................................ 78
